

# Fillguard Mini, conductivity sensor

Article number: 9125762

Thinking solutions.

## Features

Type	Fillguard Mini
Operating temperature	30
Max. perm. operating pressure	8 bar
Diameter	40 mm
Height	58 mm
Weight	0.06 kg

## Description

### Fillguard Mini

sensor for monitoring the capacity level of Fillsoft Zero demineralisation cartridges in the treatment of filling and make-up water for heating systems. Particularly suitable in conjunction with Fillsoft Zero for implementation of low-salt running according to VDI 2035.

Measuring cell with 1/4" external thread for direct installation in the head of the Fillsoft housing. Fillguard Mini continuously determines the electric conductivity of the demineralised water and indicates the level of demineralisation of the water via flashing LEDs:

- Green LED - electrical conductivity < 10  $\mu\text{S}/\text{cm}$
- Yellow LED - electrical conductivity 10-100  $\mu\text{S}/\text{cm}$
- Red LED - electrical conductivity > 100  $\mu\text{S}/\text{cm}$
