

name plate BU for marking the flow/return connections

Article number: 4200021

Thinking solutions.

Features

Type	BU
------	----

Description

Name plate for marking the heating circuits, made of galvanised steel sheet for three rows of lettering. The name plate is suitable for screwing to the finished insulation. The label field has a transparent cover for protection against external influences and dirt. Available as a red or blue version for differentiation between flow and return.
