

Reflex Hydroflow Return flow stratification L/XL

Article number: 9583559

Features

Type	L/XL
Material	CW617N
Pressure gauge	X
Max. ambient temperature	95 °C
Operating temperature	0 - 95 °C
Operating pressure	0 - 66 bar
Type of protection	IP 44
Height	163 mm
Width	78 mm
Installation length	81 mm
Depth	125 mm
Weight	2.61 kg

Description

Reflex Hydroflow L Return stratification

2-zone valve DN32 with two PT1000 sensors and electrical connection box for return stratification.

Suitable for Reflex Hydroflow as a single station or as a cascade in conjunction with conventional buffer tanks without a stratified charging pipe. The set is not required when using a Reflex Storaflow hot water storage tank, as this has a stratified charging pipe and stratified separating plate.
