

bus module BACnet MS/TP Touch, expansion for Control Touch

Article number: 8860600

Features

Type	BACnet MS/TP Touch
Electric connection	230V/50Hz
Height	22 mm
Width	50 mm
Depth	52 mm
Weight	0.10 kg

Description

Bus-Module

Bus module for conversion of the information such as operating status from the control interface of Variomat, Reflexomat or Servitec as compact modules usable with the Control Touch controller, into the data telegram.

Direct integration on the control PCB of the Control Touch. No additional assembly is necessary. Connection to Touch Control via plug socket.

Connection to the bus system: Screw terminals

Data exchange can take place via BACnet-MS/TP. After plugging in and activation in the Touch Control Unit, the module is ready for use and must be connected on site to the control technology.
