

Reflex bus module Lonworks, expansion for Control Basic and Touch

Thinking solutions.

Features

| Type | Lonworks |
|----------------------|-----------|
| Colour | green |
| Degree of protection | IP 54 |
| Electric connection | 230V/50Hz |
| Height | 200 mm |
| Width | 140 mm |
| Depth | 75 mm |
| Weight | 3.00 kg |

Description

Reflex Bus Module

Bus module for conversion of the information such as operating condition or variable network parameters from the control interface (RS 485) of Reflex Variomat, Reflexomat or Servitec with Control Basic or Touch Control Unit into the data telegram. Everything in its own plastic housing for direct integration in the corresponding control unit or optionally for wall mounting.

Installation:

Plastic switch cabinet housing can be inserted in the provided mounting slot of the control unit, as an alternative to on site wall mounting or installation in other switch cabinets.

The wiring to the control unit is likewise performed on site. Commissioning and wiring does not form part of the scope of delivery

The cable connection to the Reflex microprocessor control unit includes its RS 485 interfaces and must be site-provided analogously to the power supply. There is an interface with FFT--10 A transceiver on the LonWorks side.
