Description

Service description:

commissioning for a two-pump/compressor standard system in the Variomat Giga range by the customer service, comprising:

- Adjustment of system to the operating parameters specified by the client,
- Checking the settings and operating parameters, and the system's performance and function in the overall system,
- All set values documented in a report.

Requirements:

- electrical and hydraulic connection of the control unit, the accessory components and filled supply system.
- The expansion vessels of the pressurisation station must not be filled with water.
- A sufficient supply of filling water must be provided.

Customer benefits:

While it is entirely possible for customers to put a recently purchased system into service themselves, there are a number of reasons why commissioning by Reflex is a better idea.

- Certainty that the system is set up for optimum operation
- Excluding of possible damage due to incorrect commissioning thus reliability and avoidance of time and costs for downtimes

Commissioning date:

the service can take place within the local country inside about three weeks, internationally within about six weeks after placing of the corresponding order. Services provided by Service are net! The price does not include any site waiting times or work arising from improper installation or improper condition.

Programming the I/O and bus modules is not included in the scope of commissioning. Programming is charged separately according to time and effort.
