

# Reflex bus module Lonworks Digital, expansion for Control Basic and Touch

## Features

Type	Lonworks Digital
Degree of protection	IP 54
Electric connection	230V/50Hz
Height	110 mm
Width	110 mm
Depth	65 mm
Weight	0.48 kg

## Description

Reflex Bus-Module Lonworks Digital  
Bus module for conversion of the digital message(s) from the microprocessor controls Control Basic or Touch of Reflex Variomat, Reflexomat or Servitec into the Lonworks Digital data telegram.

The cable connection to the Reflex Control microprocessor control unit takes place over its potential-free contacts and must be site-provided analogously to the power supply. On the LonWorks side there is an interface with FFT-10 A Transceiver .

Other digital messages can also be converted in conjunction with the Reflex I/O module (option).

### Installation:

Plastic switch cabinet housing for on site wall mounting or installation in other switch cabinets.

The wiring to the control unit is likewise performed on site. Commissioning and wiring does not form part of the scope of delivery.
