

Commissioning Cat. 1 of Reflexomat, Variomat, Servitec with one pump/compressor

Article number: 7945600

Features

Description

Service description:

commissioning category 1 for a standard system in the product ranges Reflexomat, Variomat or Servitec incl. primary vessel and water make-up unit by the customer service, comprising:

- without travel and departure expenses,
- Adjustment of system to the operating parameters specified by the client,
- Checking the settings and operating parameters, and the system's performance and function in the overall system,
- Fillsoft and Fillset are checked too
- All set values documented in a report.

Requirements:

- electrical and hydraulic connection of the control unit, the accessory components and filled supply system.
- The expansion vessels of the pressurisation station must not be filled with water.
- A sufficient supply of filling water must be provided.

Customer benefits:

While it is entirely possible for customers to put a recently purchased system into service themselves, there are a number of reasons why commissioning by Reflex is a better idea.

- Certainty that the system is set up for optimum operation
- Excluding of possible damage due to incorrect commissioning thus reliability and avoidance of time and costs for downtimes

Commissioning date:

the service can take place within the local country inside about three weeks, internationally within about six weeks after placing of the corresponding order. Services provided by Service are net! The price does not include any site waiting times or work arising from improper installation or improper condition.

Programming of the expansion and bus modules does not form part of commissioning. Programming is billed separately based on time and expenditure.
