

bus module Modbus RTU Touch, expansion for Control Touch

Article number: 9125592

Features

Type	Modbus RTU Touch
Electric connection	230V/50Hz
Height	22 mm
Width	50 mm
Depth	52 mm
Weight	0.20 kg

Description

Bus-Module

Bus module for conversion of the information such as operating status from the control interface of Variomat, Reflexomat or Servitec as compact modules usable with the Control Touch controller, into the data telegram.

Direct integration on the control PCB of the Control Touch. No additional assembly is necessary. Connection to Touch Control via plug socket.

Installed in the controller housing of the Control Touch as an integrated extension module. On the Profibus side an RS 485 interface is available.

Remote control of the following functions and parameters from higher level building management system:

- Pump/compressor 1 on
- Pump/compressor 1 off
- Pump/compressor 2 on
- Pump/compressor 2 off
- Overflow valve 1 open
- Overflow valve 1 closed
- Overflow valve 2 open
- Overflow valve 2 closed
- Make-up open
- Make-up closed
- Pressure specification p0 (pressure in 1/10 bar)
