

Pulse generator

Article number: 9131441

Thinking solutions.

Features

Housing material	Plastic heat exchanger
Type of protection	IP 68
Number of outputs - analogue	1
Diameter	74 mm
Length of connection cable	200 mm
Weight	0,06 kg

Description

The Fillset Combi pulse generator extends the functionality of your water meter and enables convenient remote monitoring of water consumption. The generated pulses are transmitted to an external reading device or a data acquisition system e.g. a building management system (BMS). This allows you to keep a close eye on water consumption without needing direct access to the meter.

This solution provides greater efficiency and flexibility when controlling consumption.
