Features

Type	EEHR 2.50
Material	Stainless Steel 2.4858
Operating temperature	79 °C
Operating pressure	10 bar
Type of protection	IP 54
Electric connection	230V/50Hz
Connection	G 1 1/2"
Max. electrical rated power	2.50 kW
Min. electrical power	2.50 kW
Height	125 mm
Width	90 mm
Installation length	390 mm
Weight	1.50 kg

Description

EEHR
Electric flange-mounted immersion heater from for electric booster heating of Storatherm heating water buffer cylinders and calorifiers with corresponding screw-in socket or installation option via the inspection opening. Temperature controller up to 95°C target value setting and integrated terminal box. Installation and electrical connection performed on site. Water hardness max. 14°dH, not approved for continuous operation.
