Description

Service description:

Inspection prior to commissioning according to Section 15 of the Industrial Safety Ordinance (BetrSichV) for pressure vessels of greater than 200 litre volume by a person competent to perform the inspection in the intended area of application. Comprising:

- Organisation and documentation check, and technical inspection according to Section 15 paras. 1 and 2 Industrial Safety Ordinance (BetrSichV) to ensure safe operation
- Specification and documentation of the further procedure,
- Determination of the time period before the next periodic test according to Section 17 BetrSichV.
- Issuing of an inspection and test report according to Section 17 BetrSichV.

Requirements:

- Vessel's declaration of conformity is available, risk assessment has been performed
- Safety equipment documents are available, where applicable

Customer benefits:

- Compliance with applicable legal regulations
- Safety of pressurised system

Note:

Please note that this flat rate for the test according to Section 15 of the BetrSichV (Ordinance on Industrial Safety and Health) only applies in connection with our commissioning. In contrast to this, indicated travel costs are inclusive.

testing can take place within the local country inside about three weeks, internationally within about six weeks after placing of the corresponding order.

Testing costs are specified net cost! The price does not include any site waiting times or work arising from improper installation or improper condition.
